

# FALL IN LOVE WITH PHYSICS!

# P. SURESH KUMAR

Eminent Physics Guru,  
Founder Director of Riju & PSK Classes,  
Counsellor and Columnist

Over the course of my career I could work with students from all levels and the one common thing that I find in all of them is the lack of confidence when it comes to Problem-Solving in Physics. While the students are able to deal with all the other science subjects including Mathematics with a positive attitude, they say Physics is not their cup of tea. Why? Because the foundation is not strong enough. And the solution is? 'PSK's I Love Physics Learning Spot'.

## WHY PSK'S ILP?

Unlike the other science subjects, learning of Physics in the practical sense must start from the high school itself. After all, that what you learn in the higher secondary is the extension of your high school syllabus. So, mustn't we lay the foundation strong?

PSK's I love Physics Learning Spot aims at instilling confidence in the young minds out there and enables them to face any competitive exams such as Olympiad and NTSE.

Come, join, and let's create a generation of true Physics lovers.

## SYLLABUS HAS REDUCED MAKE SURE YOUR CAREER DOESN'T!

The government and the education department have surely made the syllabus thin for there is an ongoing pandemic. But remember, no competitive exam is going to be held only on these fewer chapters. So learn what all you have got to learn when you still have time because the future awaits you.
